PROFESSIONAL SUMMARY

Data Analyst with 6+ years of experience at Bunge Service Center Brazil, specializing in SQL and BigQuery, Google Cloud Platform (GCP), BI tools (Power BI, Tableau), ETL processes, data ingestion via SAP Data Services, and data pipeline development. Proven track record in data governance using Collibra, KPI development, process optimization, and GDPR compliance. Fluent in English. Actively seeking international opportunities and open to relocation.

PROFESSIONAL EXPERIENCE

Data Governance Analyst

Bunge Service Center Brazil | 2020 — Present | Gaspar, SC, Brazil

- Developed and maintained data governance frameworks and best practices, ensuring data consistency across business units
- Created and optimized dashboards and KPIs using Power BI and Tableau, enabling data-driven decision-making at scale
- Designed complex SQL and BigQuery queries for data analysis and ETL processes across large-scale datasets
- Implemented data catalogs using Collibra and enforced data quality standards across enterprise systems
- Managed data pipelines using SAP Data Services, Apache Airflow, and Dataflow on Google Cloud Platform
- Ensured full GDPR compliance and led data protection best-practice initiatives across the organization

Tax Analyst

Bunge Service Center Brazil | 2018 — 2020 | Gaspar, SC, Brazil

- Performed tax parameterization and supported fiscal operations across multiple business units using SAP
- Analyzed tax impacts on business processes and provided compliance recommendations
- Supported regulatory compliance efforts and participated in internal audits

Administrative Assistant

Ala Assessoria em Seguros | 2016 — 2018 | Blumenau, SC, Brazil

- Provided administrative and operational support at an insurance advisory firm

KEY PROJECTS

Master Data Cleanup (Materials)

Built an end-to-end pipeline from SAP Data Services ingestion to Google Cloud, performing full ETL and delivering approximately 15 pages of Power BI dashboards later migrated to Tableau. Improved data accuracy and enabled real-time materials tracking across the organization.

Rodo Freight Price Monitoring

Developed a visualization of price changes across multiple freight routes in SAP, highlighting price variations and outliers using Collibra and Power BI dashboards. Enabled proactive freight cost management decisions.
